

**PRO BRIDGE**
SNOWMOBILE FLEETS**Recharge your entire fleet at once.**

PRO BRIDGE for snowmobile fleets

The solution designed for electric snowmobiles keeps the entire rental fleet constantly charged and ready for customers.

CHARGING DEVICES:

- The entire drive-through charging station can be installed quickly and easily without the need for solid concrete foundations.
- AC2 chargers for 20 snowmobiles at the same time
- Charging capacity up to 22 kW / charge point
- Real-time monitoring and management of charger status and events via Plugit Cloud.
- Plugit Cloud can be directly connected to any business system via open APIs. Plugit is a pioneer in multi-purpose charging technology.
- Complete remote management capabilities and diagnostics essential for e.g. rental operations.
- HMI displays for charger operation
- RFID reader

PRO BRIDGE:

- Composite coated rigid aluminum charging bridges with a modern drive-through design.
- A spacious and well-lit charging area is a safety issue.
- The drive-through operating principle makes charging quick and easy: there is no need to turn or reverse the snowmobile, which also increases safety.

SCALABILITY AND CUSTOMIZATION:

- Thanks to Plugit-charging technology and the modular design of the charging bridges, the number of charging points can be doubled from 20 to 40.
- Plugit also applies Pro Bridge charging bridge technology to charging other vehicle types. Please, call Plugit sales for more information.
